

DataDictionary and Model Diagram

Data Dictionary for HealthPulse Project

Last Updated 23/02/2026 by Apurva Dalvi

DIM_CLINICS

Column	Description	Data Type	Key Type	Allowed Values/ Rules
provider_clinic_id	Unique identifier for clinics	Varchar(20)	Primary Key	Alphanumeric
clinic_name	Name of clinic	Varchar(100)	-	Free text
city	Name of city the clinic is based in	Varchar(20)	-	Alphabetic
hours	Operational hours of the clinic	Varchar(20)	-	Timings [from – to]

DIM_DATES

Column	Description	Data Type	Key Type	Allowed Values/ Rules
date_id	Surrogate key generated using ROW_NUMBER	Number(38,0)	Primary Key	System generated

appointment_date	Date of appointment	Date	-	YYYY/MM/DD
year	Year extracted from appointment_date	Number(38,0)	-	Derived [YYYY]
month	Month extracted from appointment_date	Number(38,0)	-	Valid values [1-12]
day	Day of month	Number(38,0)	-	Valid values [1-31]
day_of_week	Day of week (Numeric)	Number(38,0)	-	Valid values [0-7]

DIM_PATIENTS

Column	Description	Data Type	Key Type	Allowed Values/ Rules
patient_id	Unique identifier for patients	Varchar(20)	Primary Key	Alphanumeric
age	Patient's age	Number(3,0)	-	Numeric
insurance_type	Insurance classifier	Varchar(20)	-	Valid values [Public, Private, Self-pay]

DIM_PROVIDERS

Column	Description	Data Type	Key Type	Allowed Values/ Rules
provider_clinic_id	Unique identifier for providers	Varchar(20)	Primary Key	Alphanumeric
specialty	Specialty of provider	Varchar(100)	-	Free text
clinic_assignment	Scheduling pattern classifier	Varchar(20)	-	Valid values [Fulltime, Part-time, Rotating]

FACT_APPOINTMENT

Column	Description	Data Type	Key Type	Allowed Values/ Rules
appointment_id	Unique identifier for appointments	Varchar(20)	Primary Key	Alphanumeric
patient_id	Unique identifier for patients	Varchar(20)	Foreign Key	Must exist in dim_patients
provider_clinic_id	Unique identifier for providers	Varchar(20)	Foreign Key	Must exist in dim_providers
clinic_id	Unique identifier for clinics	Varchar(20)	Foreign Key	Must exist in dim_clincs
date_id	Surrogate key generated using ROW_NUMBER	Number(38,0)	Foreign Key	must exist in dim_dates

appointment_time	Time of appointment	Time	-	HH:MM:SS
lead_time_days	Days from date of booking appointment	Number(5,0)		Number >= 0
wait_time_minutes	Waiting time for patients	Number(5,2)	-	Floating number >= 0.0
is_no_show	Categorical value of whether the patient showed up	Number(2,0)	-	Valid values [0,1]
status	Derived values from is_no_show	Varchar(20)	-	1. – Completed 2. -No show
